**Subject:** CES: FT1004 Chemical Treatment  
**Date:** Thursday, March 05, 2015 6:34:58 PM

---

**Don:**

**This activity has been rescheduled for Wednesday, March 11. The crew will show up at 0830 and I assume after set up they will begin about 0930/1000. They will be using a 15% solution of Sodium Hypochlorite and a chemical called Captaban to provide the deodorizing of the materials and then it will be shipped to Lonestar Ecology for pre-treatment prior to going to Gulf Coast Waste Disposal Authority for Wastewater Treatment.**

**Thanks**

**Gary Moore**
